

From INNATE to ADAPTIVE Immunity

a question of memory

1-2 July 2024
Berlin, Germany

symposium2024-drfz.de

Nr. 11/April 2024

Dear friends of the DRFZ,

This summer, the DRFZ, Charité – Universitätsmedizin Berlin and the MPI for Infection Biology are organising a symposium recognising the transition of scientific leadership at the DRFZ. The organisers have put together an impressive programme with a plethora of internationally renowned speakers celebrating innate and adaptive immunity as championed by Andreas Radbruch and Eicke Latz. There's not much time left to submit an abstract with the 30.04.2024 deadline fast approaching. Be sure to register now to secure your place at the symposium!

[More about the symposium](#)

New research groups

Johanna Callhoff

has headed the group **Health Services Research in the Epidemiology department** since 1 November 2023.

[News](#)

Vikram Sunkara

has headed the new liaison group with the [ZIB](#) since 15 December 2023: **Explainable AI for inflammation.**

[News](#)

Anne Regierer

has headed the new group **Registry Research in Rheumatology** since 1 January 2024.

New Society founded

European Society for Spatial Biology (ESSB)

Together with colleagues from Heidelberg, Tübingen, Rehovot and Cambridge, Anja Hauser, head of the Immune Dynamics group, has founded the European Society for Spatial Biology. Spatial biology is an interdisciplinary field that analyses the three-dimensional organisation and interaction of individual cells within complex tissues and organisms.
