

1. Leibniz Summer School on Chronic Inflammation

Connecting Concepts of Chronic Inflammation

Keynote Lectures

Translation

| Thursday, May 3, 2018, DRFZ SR 1/2

14:30 Prof. Craig Garner
Deutsches Zentrum für Neurodegenerative
Erkrankungen (DZNE) Berlin

How to translate

How can we accelerate the translation of promising new therapies into the clinic?

Concepts of Chronic Inflammation

| Friday, May 4, 2018, Hörsaal Pathologie*

16:00 Prof. Christian Kurts
Institute of Experimental Immunology
Rheinische Friedrich-Wilhelms Universität Bonn

The renal mononuclear phagocyte system in health and disease

Cellular characteristics and known functions of renal mononuclear phagocytes as they relate to homeostasis, immunological surveillance as well as immune-mediated inflammatory injury and repair is discussed.

17:00 Prof. Samuel Huber
Department of Molecular Immunology and
Gastroenterology, Universitätsklinikum
Hamburg-Eppendorf

Immune-microbiome interactions in inflammatory bowel disease (IBD)

The cross talk between the immune system and the microbiota in health and disease is discussed.

18:00 Prof. Stefanie Kürten
Institute of Anatomy and Cell Biology
Friedrich-Alexander Universität Erlangen

How are brain and gut connected in Multiple Sclerosis?

The pathomechanistic link between the autoimmune attack on the CNS and ENS pathology in Multiple Sclerosis, which might provide a paradigm shift in our current understanding of the disease is discussed.
