The ScienceCampus CHRONIC INFLAMMATION

Understanding the causes of chronic inflammatory diseases is our aim. Scientists and clinicians of different disciplines work together to investigate similarities and differences of chronic inflammatory diseases e.g. of the joints, the gut, the skin or the brain. Therapies are developed jointly. The ScienceCampus Chronic Inflammation is an initiative of the German Rheumatism Research Center Berlin (DRFZ) and the Charité-Universitätsmedizin Berlin funded by the Leibniz Association.

WELCOME

LEIBNIZ SUMMER SCHOOL ON CHRONIC INFLAMMATION 2018

The aim of the Leibniz ScienceCampus is to understand chronic inflammatory diseases. Physicians and basic scientist from different specialties work together translating therapeutic concepts from one disease to another, and monitoring their efficacy with cutting-edge bio-medical technology. This offers unique chances to identify the drivers of inflammation in each disease, and define innovative ways to block them.

The target audience of the Leibniz Summer School of Chronic Inflammation are excellent young medical academics in their first years of practical education (Ärzte in Weiterbildung), and basic scientist interested in chronic inflammation.

The goal is to integrate persons in the clinical and scientific activities and to encourage a perspective beyond professional borders.

The lectures will be open for the public.

PROGRAM

2 DAYS OF INTERDISCIPLINARY TRAINING FOCUSING

- Rheumatology
- Dermatology
- Gastroenterology
- Neurology

with

- Flipped classrooms
- Simulated patients
- Clinical theoretical and basic science
- Poster session
- Keynote lectures

APPLICATIONS & INFORMATION

PARTICIPATION

Up to 20 medical doctors and young academics can participate. For medical doctors it is recommended to have a strong interest in basic science and for basic scientists it is recommended to be attracted by clinical topics.

FACULTY

- Philipp Enghard
- Guido Heine
- Ahmed Hegazy
- Bimba Hoyer
- Donata Lissner
- Agata Mossakowski
- Ronja Mothes
- Lennard Ostendorf
- Julia Polansky
- Helena Radbruch
